

Advice on Digital Commerce API

We help you optimize your e-commerce logistics

Get in touch with us:
digital-commerce@swisspost.ch

Optimized e-commerce logistics processes provide greater convenience for your customers and more efficiency for you. By integrating our e-commerce logistics interfaces, you can optimize and accelerate your internal processes and offer your customers new services. We help you get the most out of Swiss Post's logistics interfaces to improve your success on the market.

Our expertise

- Due to our many years of experience in logistics, Post CH Ltd has extensive expertise in the processes involved in online sales.
- Thanks to our specialists in fields such as fulfilment, logistics, warehousing and marketing, we can rely on a broad network and offer additional services for digital retail.

Our services

- We help you find out what your customers expect in terms of logistics and returns services, and we show you the trends in your industry.
- We analyse the strengths and weaknesses of your e-commerce logistics and identify optimization potential.
- We present the most effective e-commerce logistics interfaces for your business and show you how to integrate them.

The benefits for you

- We offer a professional, external perspective that will help you identify and fix problems with your shipping and returns process.
- We help optimize your logistics services and enhance customer convenience.
- We support your internal IT department or IT provider during the integration process.
- Our logistics interfaces will:
 - Save you time and resources by automating processes
 - Improve the flexibility and convenience of the order process for your customers
 - Boost customer loyalty by providing a better shopping experience

Who is this service for?

Companies looking to optimize and automate their e-commerce logistics processes.
